Testing via Apptimized TO GO Agent

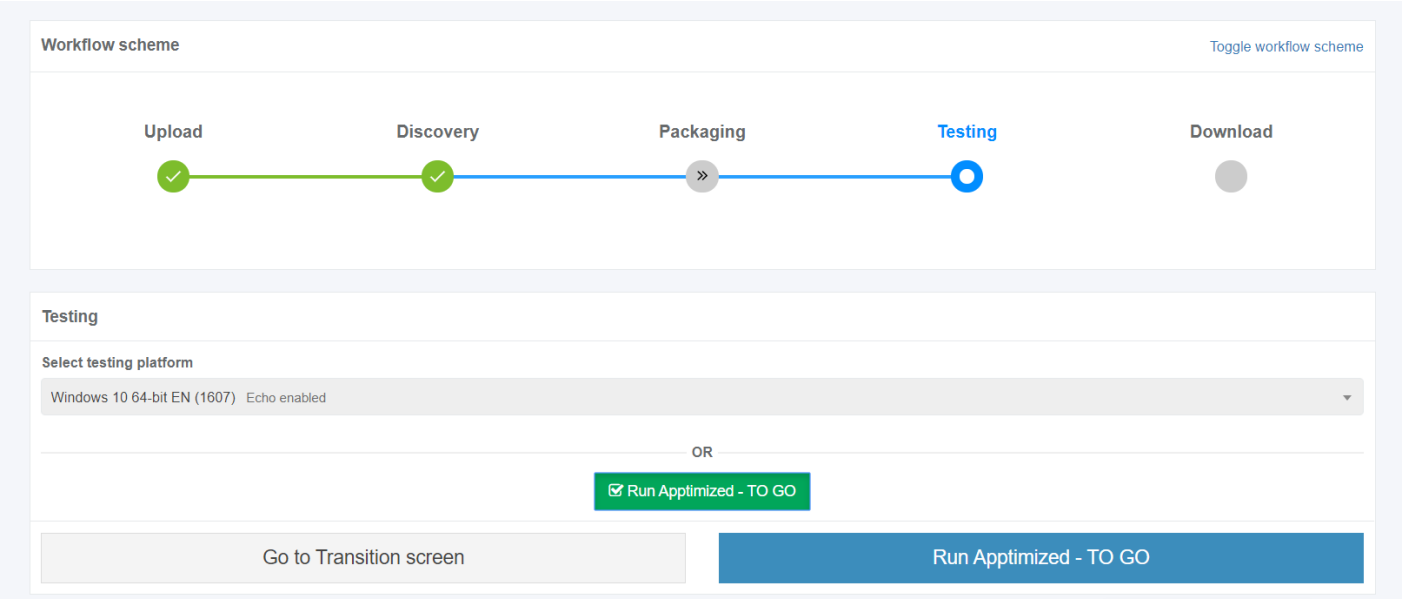

Before implementing the **Testing** via **Apptimized TO GO** the application must be imported to the project.

Using the **Testing** module, a customer can record a guide to install and configure the application. Also, a testing option can be enabled and the status of the testing can be set.

The testing process starts by clicking on the **Skip for Testing** button (before or after discovery step) and clicking in the **Testing** module on the Transition screen.

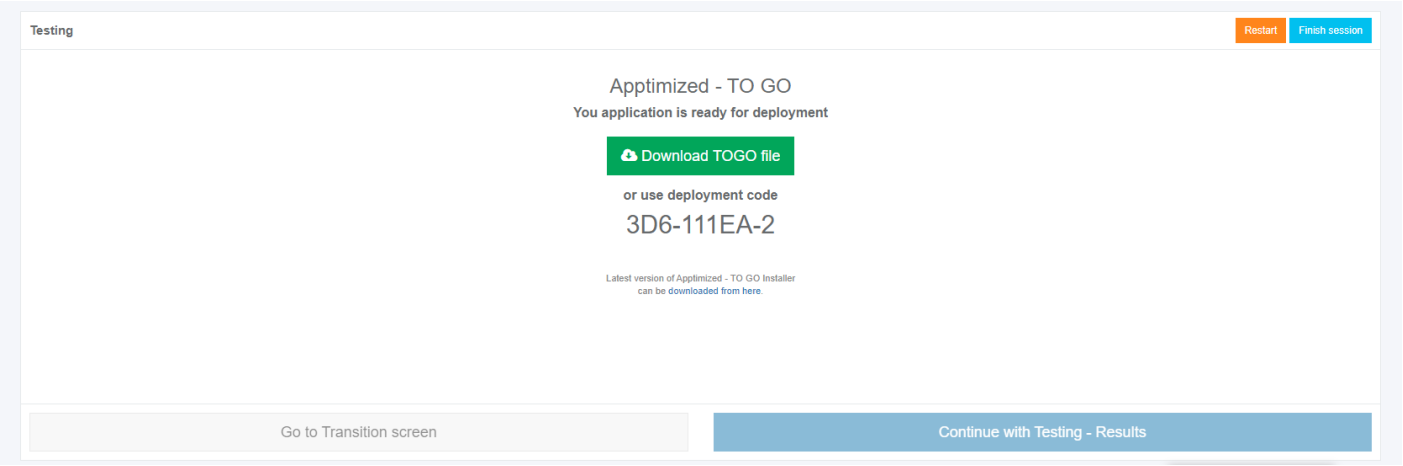

Apptimized shows the following interface when successful:

A field "**Select discovery platform**" is filled automatically and can be changed if needed.

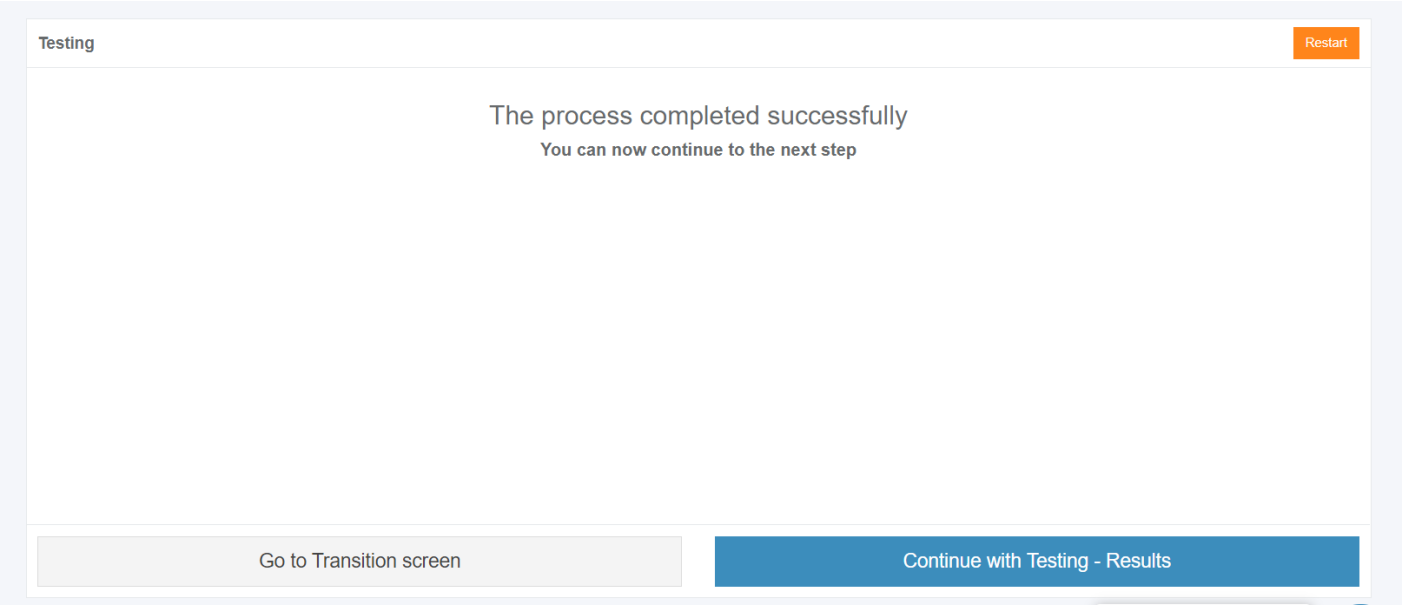

The **Apptimized To Go** is enabled by ticking the checkbox and clicking on the **Run Apptimized - To Go** button.

The files synchronizing process may take a while. In case of success, Apptimized shows the following interface:

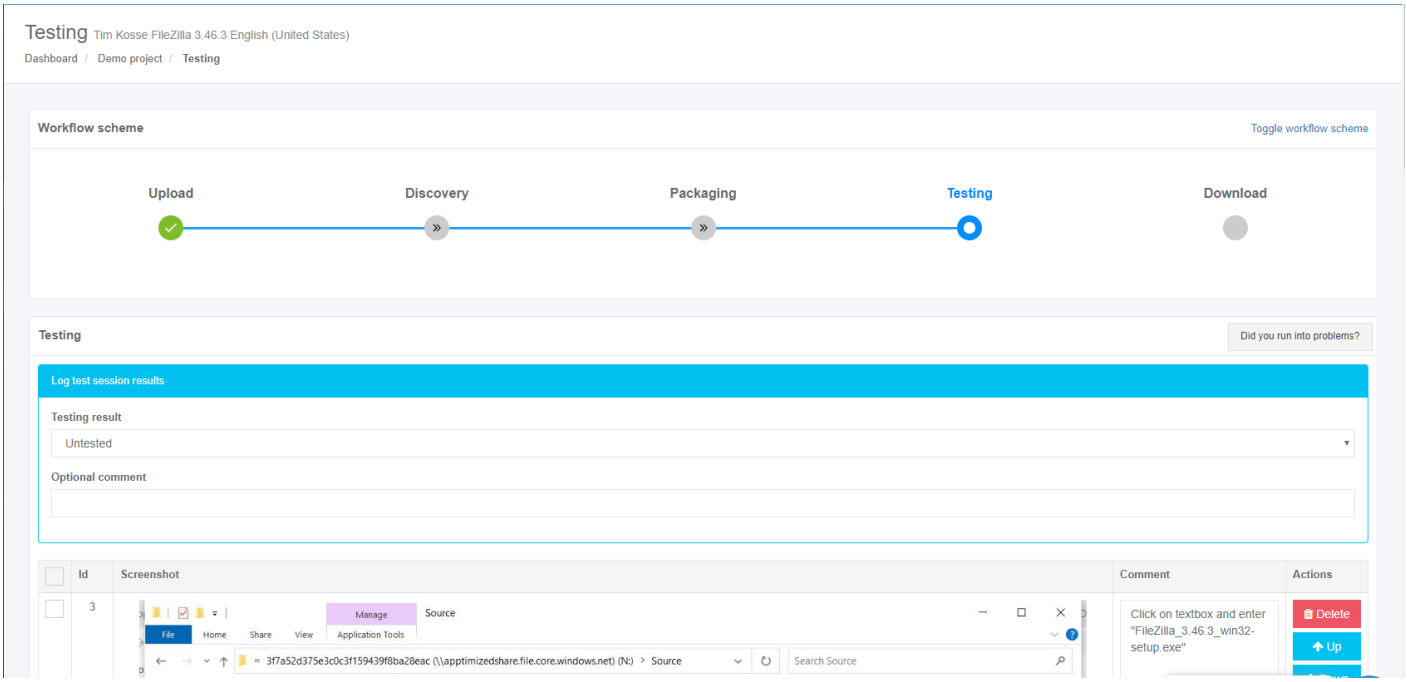

The instructions to launch **Apptimized TO GO agent** were provided in the paragraph "Run the Apptimized TO GO agent".

The following interface will appear when recording session with **Apptimized TO GO agent** finishes:

Screenshots editing mode becomes active when clicking on the **Continue with Testing - Results** button.

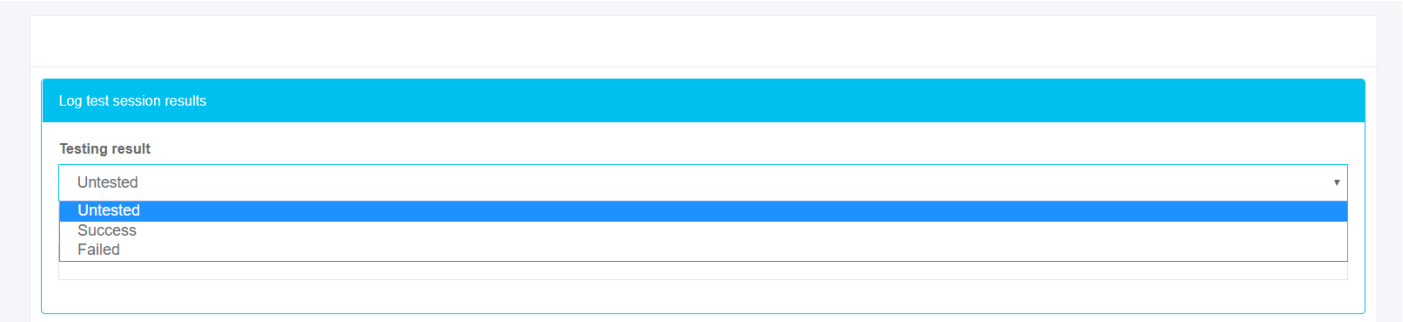

Apptimized shows the following interface when successful:

The following options to log test session results are available:

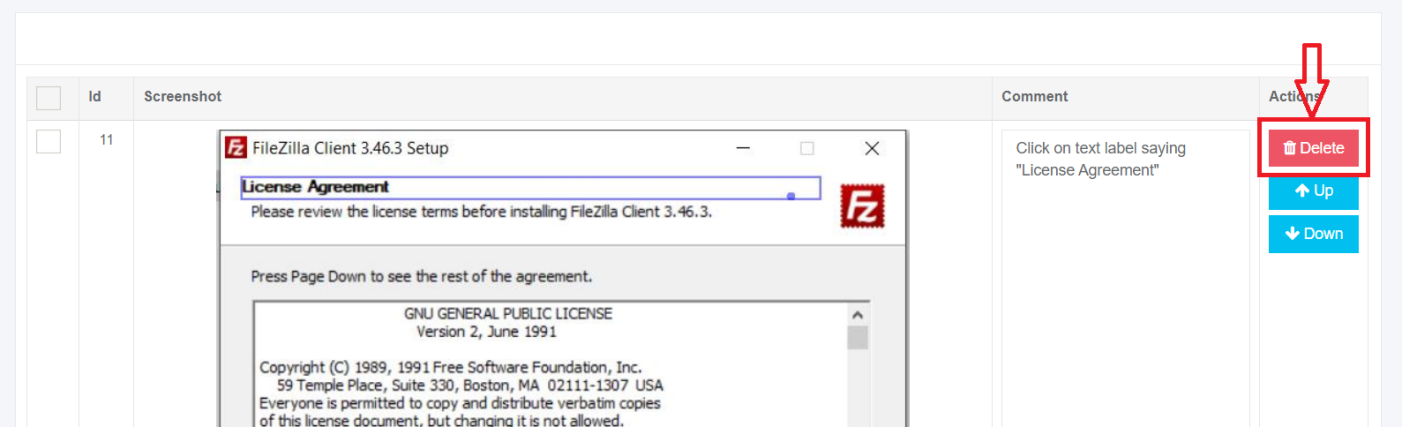

- Untested;
- Success;
- Failed.

The default value is **Untested**.

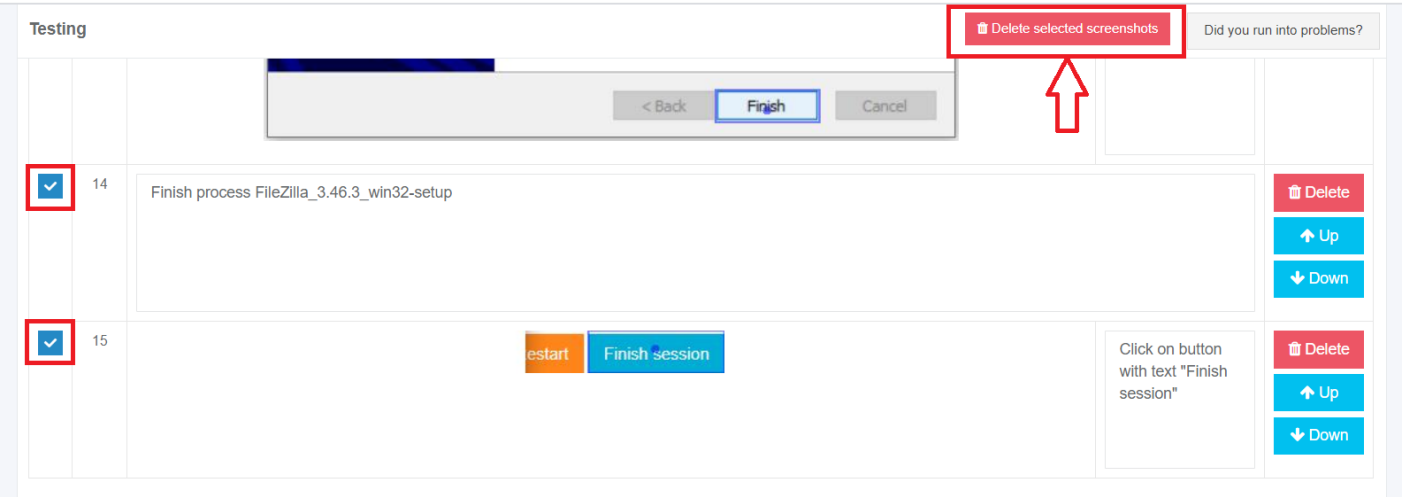

The field **Optional comment** can stay blank.

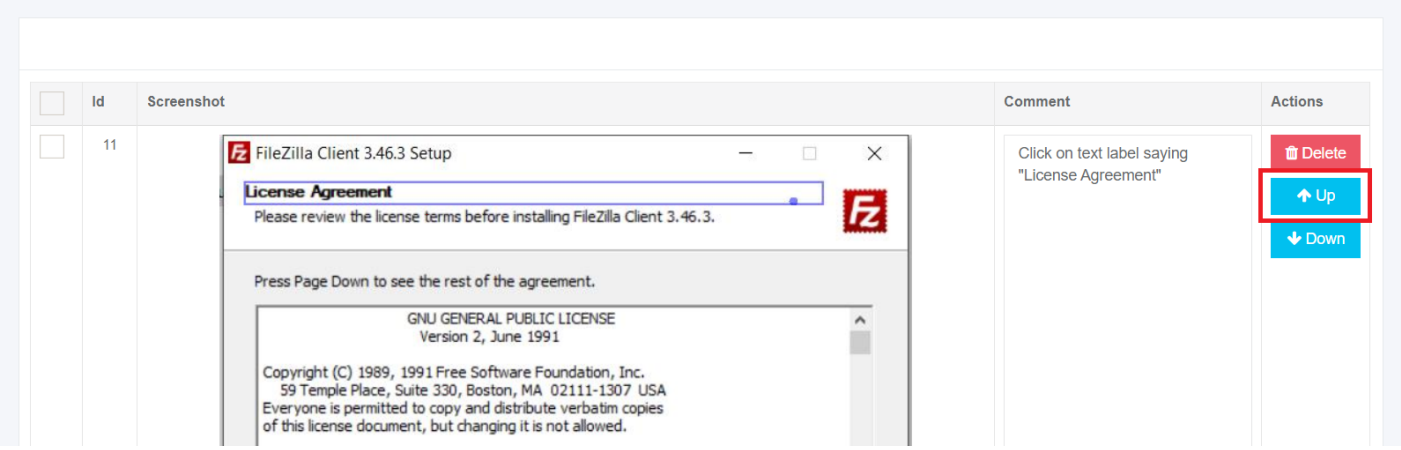

Screenshots can be excluded from discovery by clicking on the **Delete** button.

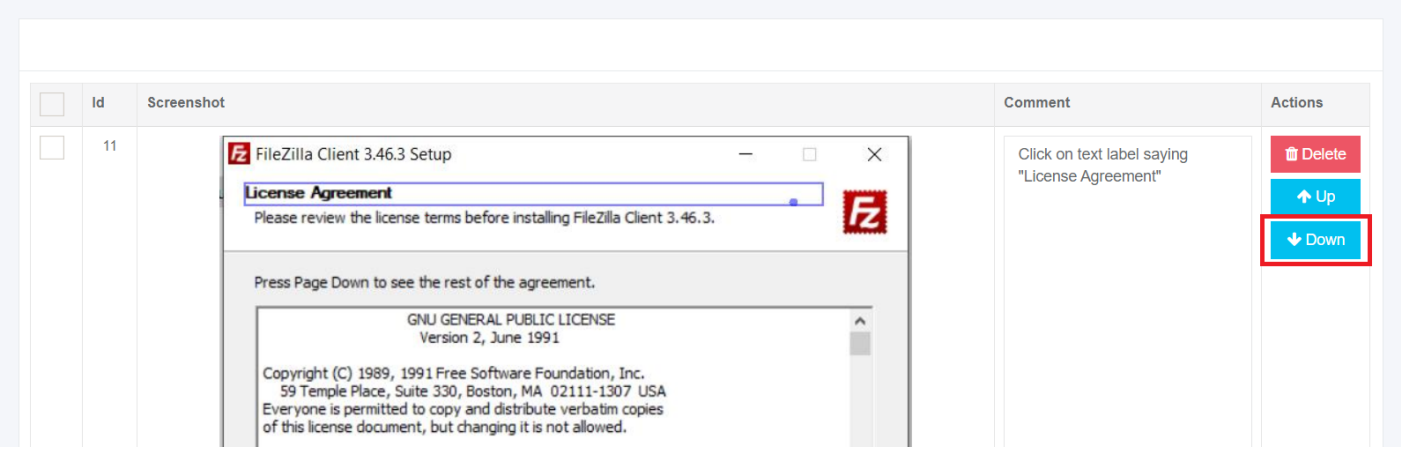

Screenshots can be excluded from discovery in a multiple mode by unticking checkboxes in front of their ID and clicking on the **Delete selected screenshots** button.

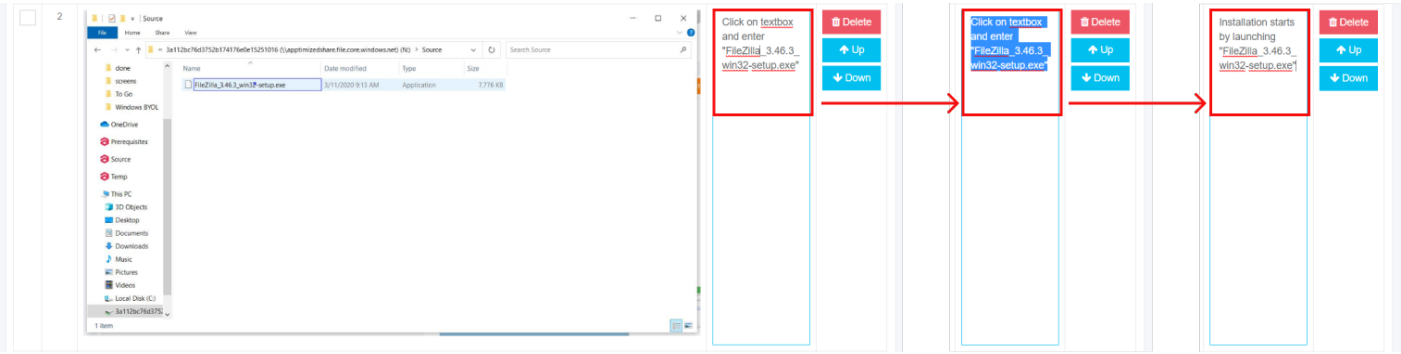

Screenshots sequence can be changed in discovery by clicking on the **Up** or **Down** buttons.

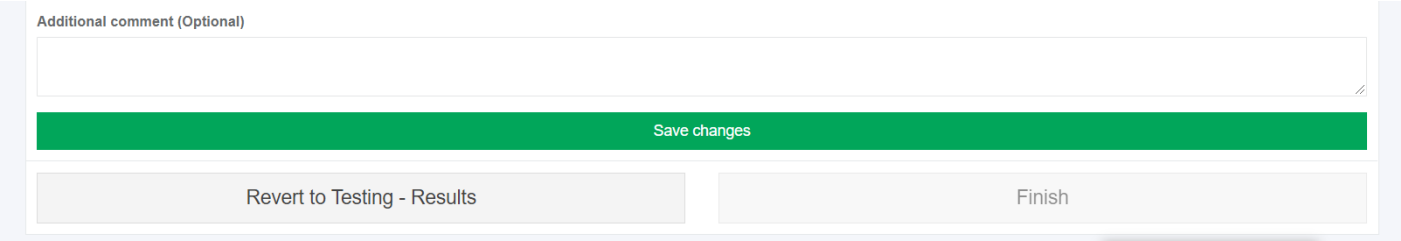

Comments to the screenshots can be edited by clicking on the comment cell.

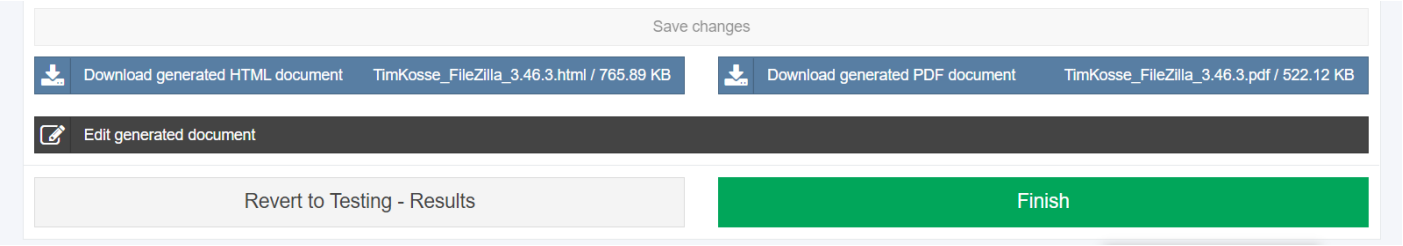

The field **Additional comment (Optional)** can stay blank.

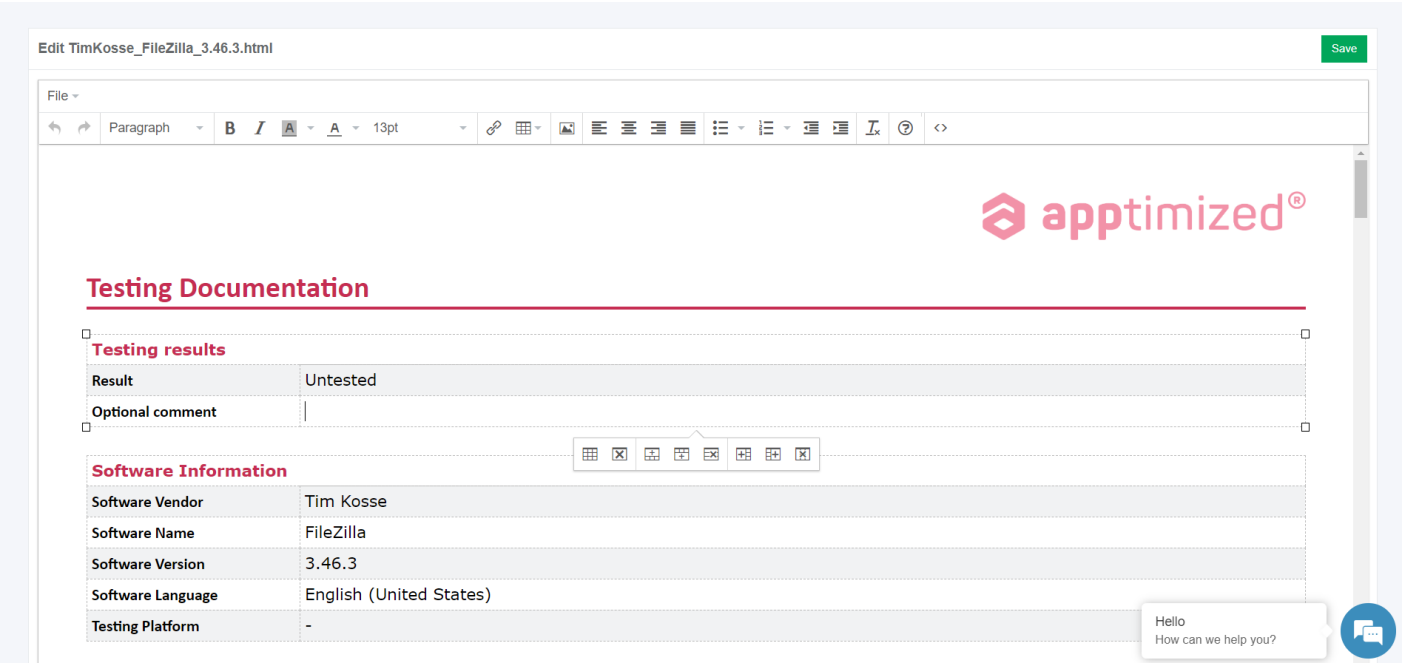

Screenshots editing mode finalizes when clicking on the **Save changes** button.

Apptimized shows the following interface when successful:

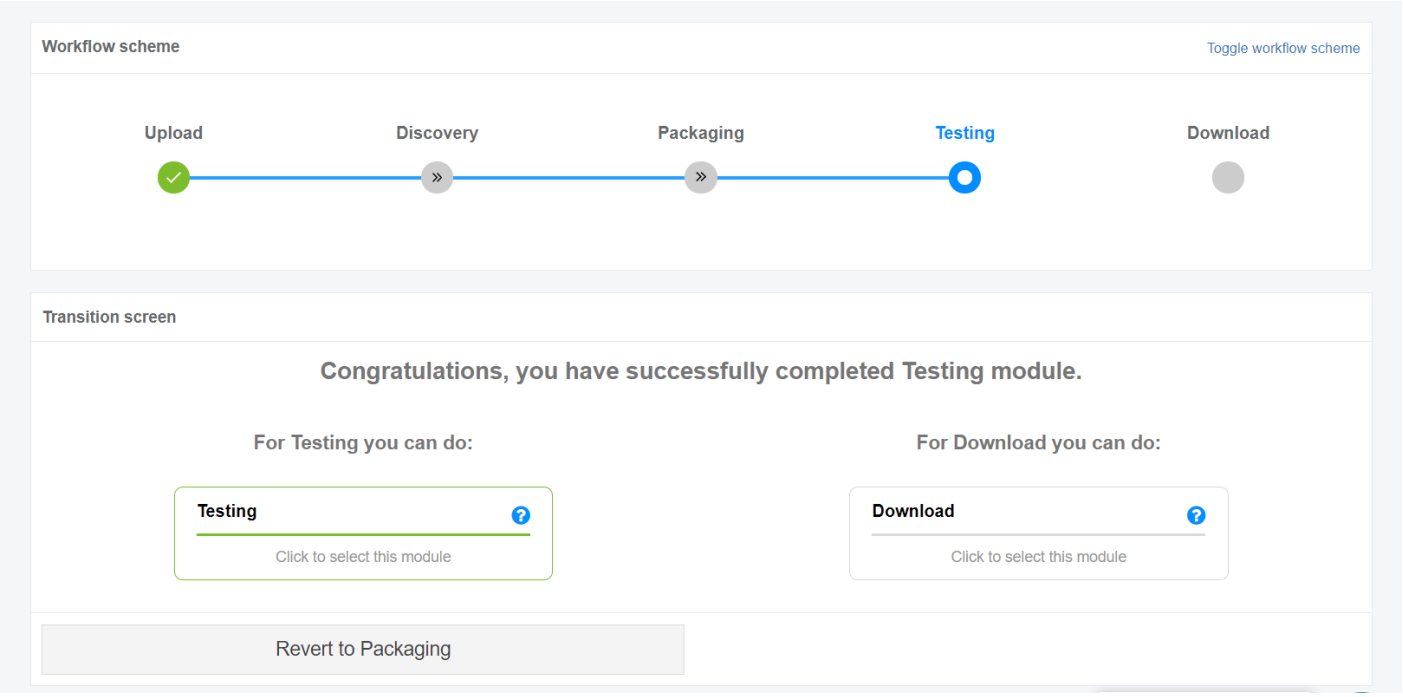

The generated document is available in PDF and HTML formats. Download starts when clicking on the **Download generated HTML document** or **Download generated PDF document** buttons.

A testing document can be edited by clicking on the **Edit generated document** button. The document editing finalizes by clicking on the **Save** button.

The process reverts to the screenshots editing mode by clicking on the **Revert to Testing - Results** button and finalizes by clicking on the **Finish** button.
