Download

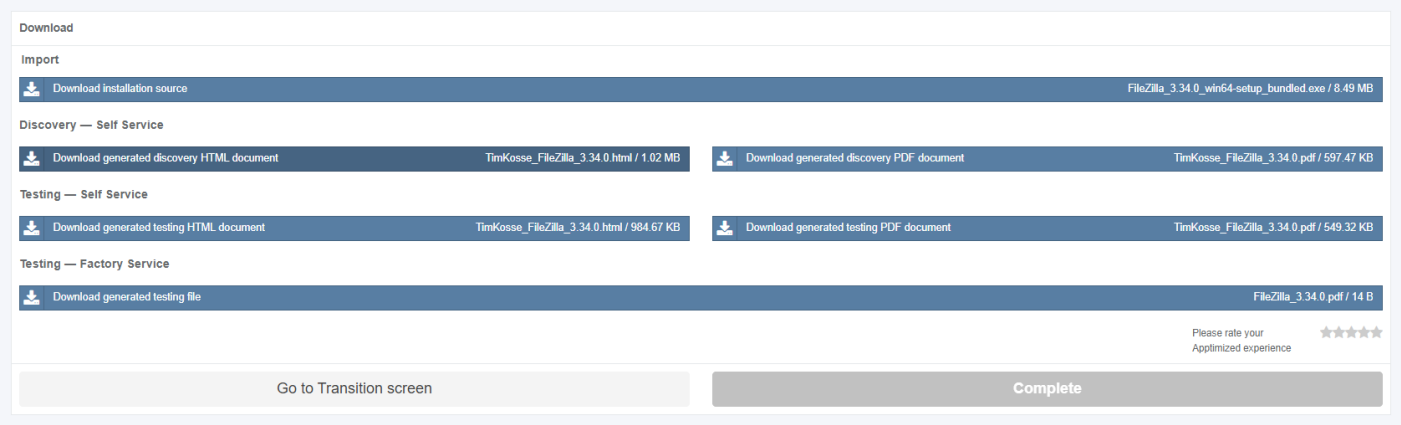

The download process starts by clicking the **Download** module on the **Transition screen**:

The set of documents to download depends on:

- the workflow structure (i.e., the number of steps, the set of module types) that was configured during project creation;
- the number of steps a user completed (a user can skip steps (for example, after importing the application user proceeds to the testing step). Thus, regardless of the workflow structure, the step may remain without results (generated documents), if the user skipped it.

The screenshot below shows the examples of possible download page configurations:

The option to download results is available under the **Download installation source,** or **Download package,** or **Download generated [discovery/testing] HTML document,** or **Download generated [discovery/testing] PDF document** buttons.

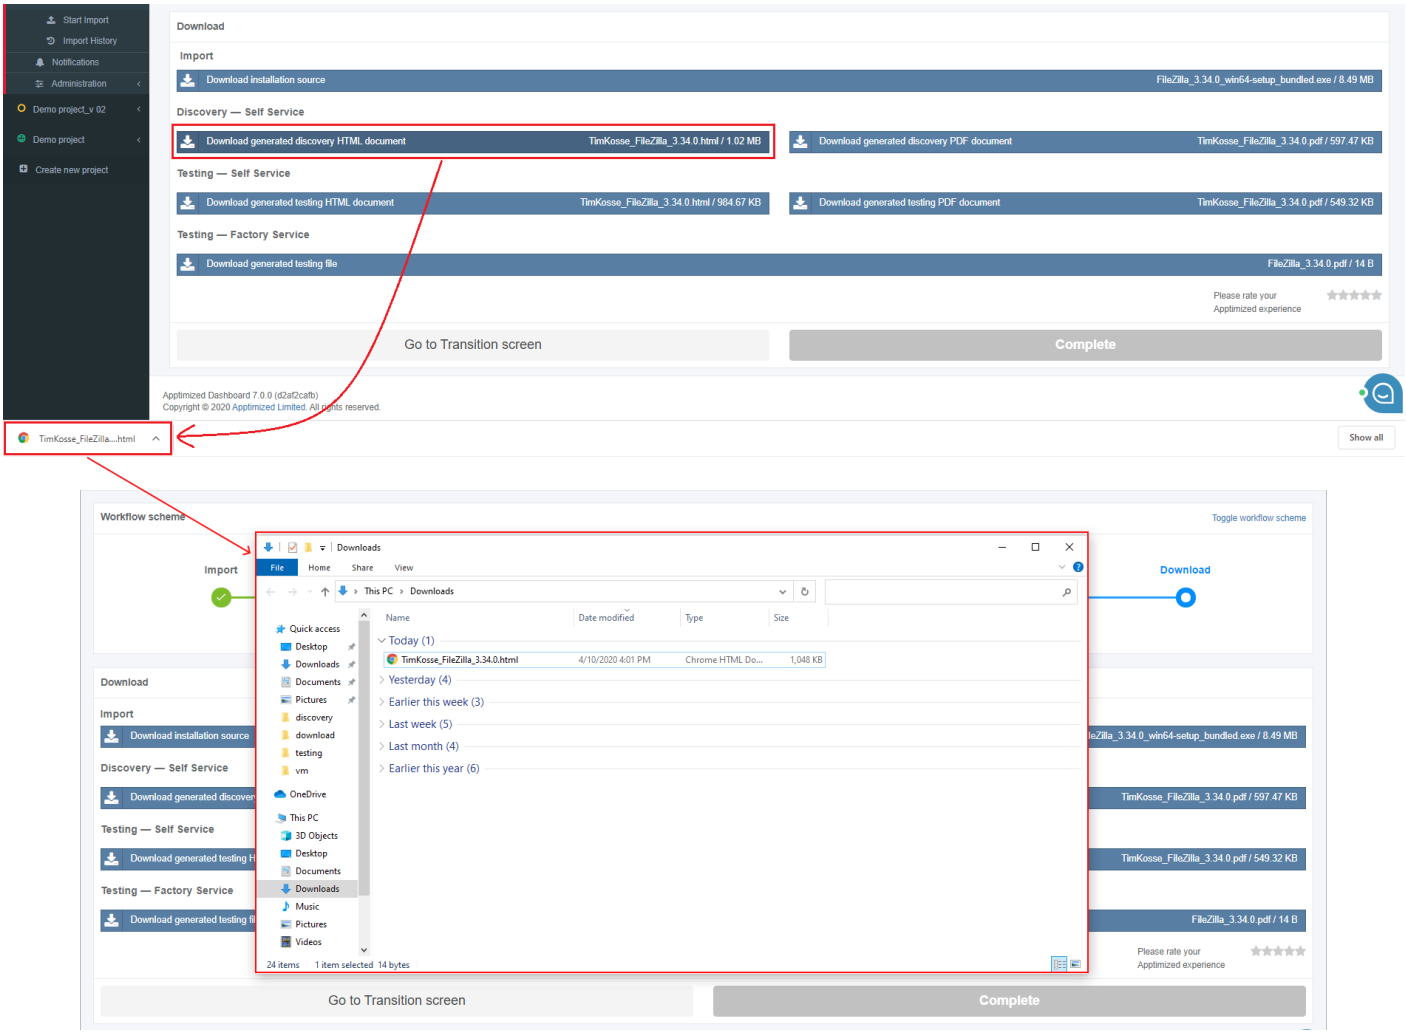

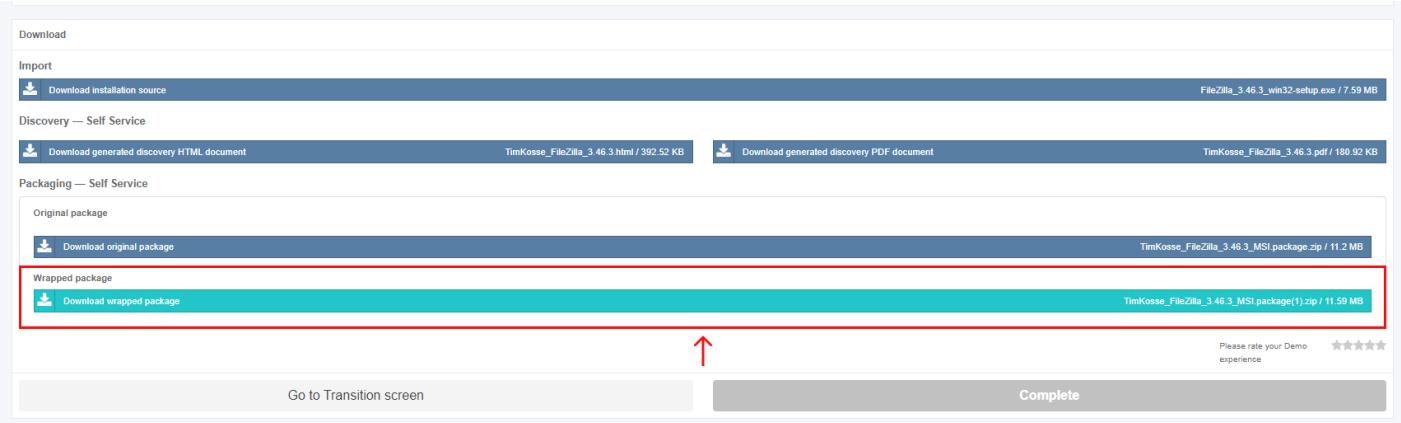

Table 1. Possible download document options

Step	Type of a document	Extensions	Example
Import	Installation source Discovery document	EXE HTML, PDF	FileZilla_3.34.0_win64-setup_bundled.exe

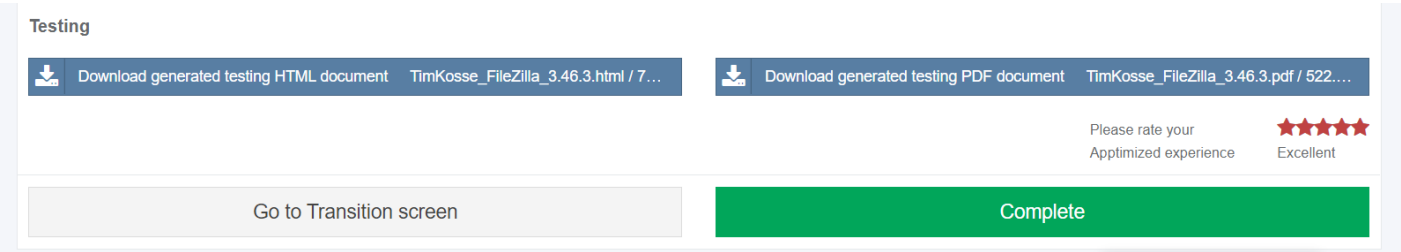

Discovery – Self Service Discovery – Factory Service	Discovery document	HTML, PDF	TimKosse_FileZilla_3.34.0.pdf TimKosse_FileZilla_3.34.0.html
Packaging – Self Service Packaging – Factory Service	Package	MSI, MSIX, App-V, VSL, ZIP	FileZilla_3.34.0.msi
Testing – Self Service Testing – Factory Service	Testing document	HTML, PDF	TimKosse_FileZilla_3.34.0.pdf TimKosse_FileZilla_3.34.0.html

In case of a wrapping functionality was used, a wrapped package becomes available at **Packaging - Self Service step** deliverables:

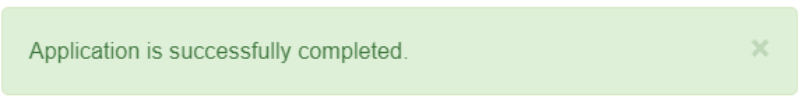

The process reverts to the initial screen by clicking the **Go to Transition screen** button.

The process finalizes by clicking on the **Complete** button.

> **Note.** Rating the Apptimized experience is optional.

Apptimized shows the following notification when successful:
