Search...

Drag a column header and drop it here to group by that column

1 - 10 of 32 items

Start time	User	End time	Import type	Status
02/02/2019 09:07	Anatoliy Bogachev	02/02/2019 09:08	Classic import	✓ Finished (1/1)
02/02/2019 09:12	Anatoliy Bogachev	02/02/2019 09:12	Classic import	✓ Finished (1/1)

Application import history data is grouped into 5 categories:

- Start time;
- End time;
- User;
- Import type;
- Status.

The columns in the import history table can be swapped and grouped in any order. A user can drag and drop a column header to a suitable place.

The first screenshot shows the 'Import History' table with columns: Start time, User, End time, Import type, and Status. The 'Start time' column header is highlighted with a red box. A red arrow points from this box to the second screenshot, where 'Start time' has been moved to the first position, before 'User'.

To filter data in column **Import type** use **Edit Column Settings > Filter > Select all / SCCM import / CSV import / Classic import > Filter** button. To exclude import types from the import history table, uncheck boxes next to the name not required in view.

The first screenshot shows a table with columns 'Import type' and 'Status'. A red box highlights the menu icon in the 'Import type' header. A red arrow points from this box to the second screenshot. The second screenshot shows the 'Filter' menu open, with a red box around the 'Filter' button. A red arrow points from this box to the third screenshot. The third screenshot shows the 'Import History' table with a red box around the entire table area.

To filter data in columns **Start time** or **End time** by date, use **Edit Column Settings > Filter > Show items with value that > Filter** button.

The screenshot shows a table with a date and time column. A context menu is open over the table, showing options like 'Sort Ascending', 'Sort Descending', 'Columns', and 'Filter'. The 'Filter' option is selected, and a sub-menu is open showing a date picker and a 'Filter' button.

To filter data in column **User** by username, use **Edit Column Settings > Filter > Select username > Filter** button. To exclude usernames from the import history uncheck the box in front of the names not required in view.

02/02/2019 09:07	02/02/2019 09:08	Anatoliy Bogachev	Classic import	Finished (1/1)
02/02/2019 09:12	02/02/2019 09:12	Anatoliy Bogachev	Classic import	Finished (1/1)

Start time	End time	User	Import type	Status
03/02/2020 12:45	01/01/0001 02:00	Anatoliy Bogachev	SCCM Import	Finished (0/1)
03/02/2020 12:49	01/01/0001 02:00	Anatoliy Bogachev	SCCM Import	Finished (0/1)
03/05/2020 09:35	01/01/0001 02:00	Anatoliy Bogachev	CSV import	Finished (0/0)
03/05/2020 12:35	03/05/2020 12:37	Anatoliy Bogachev	SCCM Import	Finished (3/3)

ID	Vendor	Software	Version	Language	Settings
17	EDEKA	EDEKA-Fonts-1.2-X86-MUI-01	1.2	en-US	Settings
18	Vendor	App-V5ConfigurationEditor	1.0	en-US	Settings
19	TimKosse	FileZilla	3.46.3	en-US	Settings

Application import history data of a particular import is grouped into 5 categories:

- ID;
- Vendor;
- Software;
- Version;
- Language.

The columns in the import history table can be swapped and grouped in any order. A user can drag and drop a column header into a suitable place.

The sorting and filtering options are applied as in the previous example.

The option to change an application setting is available under the **Settings** button.
