

SCCM Import

The option to start the import is called “**SCCM Import**”. It is available under **Import** in project menu > **Start Import** section > **SCCM import** option.

The initial preparation may take a few moments.

In case of a connection failure, Apptimized shows the following message:

Single import session imports a single folder. For example, one of the following folders import in the scope of import session: root folder **Application** or folder **Test 1** or folder **bis_628**.

Note. The checkbox **All applications** always relates to the current folder. The screen below shows the content import in the root **Applications** folder.

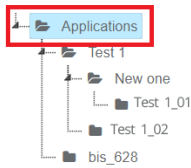

Applications can be excluded from import by unticking checkboxes in front of their names.

Upload one or multiple files from your local computer or load directly from the Internet.

By using a CSV file, you can import large numbers of files and their details at a time.

consuming and error prone due to the complex nature of SCCM.

1. Choose container and its applications

- ☒ All applications
- ☒  APPT-Fonts-1.2-X86-MUI-01
- ☒ VirtualEngine_App-V5ConfigurationEditor_1.4_EN
- ☒ TimKosse_FileZilla_3.46.3_English(UntiedStates)
- ☒ Microsoft.NETCoreSDK2.2.108(x86)

Next

Note. The icon below means that this application already exists in the project portfolio but can be imported for a second time. As a result, duplicates are created in the project portfolio.

☒  APPT-Fonts-1.2-X86-MUI-01

The import process starts by clicking on the **Next** button. It can take up to **30 minutes** and is dependent on the number of applications and their size.

“Set metadata” shows import candidates' meta information and provides the ability to update it to desired values. All required fields are marked with an asterisk *.

1. Choose container and its applications

2. Set metadata

<p>Application #1</p> <p>Application name* APPT_Fonsts-1.2-X86-MUI-01</p> <p>Vendor* EDEKA</p> <p>Version* 1.2</p> <p>Language* en-US</p>	<p>Application #2</p> <p>Application name* App-V5ConfigurationEditor</p> <p>Vendor* </p> <p>Version* </p> <p>Language* en-US</p>
<p>Application #3</p> <p>Application name* FileZilla</p> <p>Vendor* TimKosse</p> <p>Version* 3.46.3</p> <p>Language* en-US</p>	<p>Application #4</p> <p>Application name* Microsoft.NETCoreSDK2.2.108(x86)</p> <p>Vendor* </p> <p>Version* </p> <p>Language* en-US</p>

Back Finish

Exclude applications from the import by unticking the checkbox.

Application #2

Application name *

App-V5ConfigurationEditor

Vendor *

Version *

Language *

en-US

Application #4

Application name *

Microsoft.NETCoreSDK2.2.108(x86)

Vendor *

Version *

Language *

en-US

The process reverts to the initial screen by clicking on the **Back** button and finalizes by clicking on the **Finish** button.

Apptimized shows the following notification when successful:
